-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Schaefer (US 6,336,560).

Schaefer (Fig. 1-7) teaches a spreading device for spreading a plurality of side-by-side elements by a pre-determined distance, said device

comprising a plurality of recesses, each recess configured for receiving an element, adjacent recesses spaced apart by said pre-determined distance and separated by a tooth (Fig. 4, 5; col. 5-6 teaching comb 46 with slots 44 shown receiving elements in fig. 2). Further, Applicant is respectfully reminded that claim language consisting of functional language and/or intended use phrasing is given little, if any, patentable weight as the apparatus must merely be capable of functioning, or being used, as claimed. See MPEP 2112.02, 2114. Here, the device cited above is certainly capable of having elements that can be spread by said pre-determined distance by orientating said spreading device so that said recesses extend diagonally across said group of elements at an angle such that respective teeth are disposed between adjacent elements, pushing said teeth between said adjacent elements so that

Art Unit: 3653

individual elements are guided into respective recesses, and re-orientating said spreading device so that said recesses lie substantially transverse to said elements, thereby spreading said articles by said pre-determined distance.

### ***Allowable Subject Matter***

Claims 1-9 and 13 are allowed.

Claims 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Any references not explicitly discussed above but made of record are considered relevant to the prosecution of the instant application.
